

Ustowo, 4 March 2026

Dear Customers,

In connection with the entry into force of Commission Implementing Regulation (EU) 2026/157 of 23 January 2026, imposing a definitive anti-dumping duty on imports of candles, thin candles and similar products originating in the People's Republic of China, the candle market is currently facing a significant increase in costs.

The imposed duty of 60.3%, applicable for a period of at least five years, has a substantial impact on import costs and consequently on price levels across the entire industry.

We are closely monitoring the situation and responding to market changes, fully aware of how important this product category is to your sales. We are making every effort to minimise the impact of the new regulations on your business.

Please be informed that in our company, price changes resulting from the new customs duty rates will come into effect as of 22 March 2026.

At the same time, we will continuously analyse developments and respond to market needs, adjusting our pricing policy in a responsible manner and in a way that is as favourable as possible for our Partners.

Thank you for your understanding and trust. Should you have any questions, we remain at your disposal and will be pleased to assist you in planning your orders.
